

S&P 500 Financial Analysis

A financial analysis project using **Google Sheets** to analyze financial performance of S&P 500 companies, with a focus on revenue, profitability, operating performance, and year-over-year growth.

Project Overview

This project analyzes financial data from S&P 500 companies for 2020 and 2021. The analysis includes data auditing, financial performance calculations, company-level comparisons, pivot tables, and an interactive dashboard.

The goal is to demonstrate practical **financial data analysis and spreadsheet skills** relevant to data analyst and financial analyst roles.

Tools Used

- Google Sheets
- Excel
- Pivot Tables
- Spreadsheet formulas
- Data cleaning and validation
- Financial analysis
- Data visualization

Project Structure

- `financial_analysis_sp500.xlsx` — Complete analysis workbook
- Raw Data
- Data Audit
- Cleaned Data
- Financial Analysis
- Pivot Tables
- Dashboard

Analysis Performed

Data Cleaning & Auditing

- Checked missing values
- Checked duplicate records
- Validated date fields
- Identified unusual financial values
- Created data-quality flags

Financial Analysis

- Total Revenue
- Gross Profit
- Operating Income
- Net Income
- Gross Profit Margin
- Operating Margin
- Net Profit Margin
- Year-over-Year Growth
- Cost structure analysis
- Company-level financial comparisons

Company Analysis

Identified top companies based on:

- Revenue
- Operating Income
- Net Income
- Operating Margin

Dashboard

The dashboard presents key financial KPIs and visualizations, including:

- Total Revenue
- Total Gross Profit
- Total Operating Income
- Total Net Income
- Revenue Growth
- Revenue comparison between 2020 and 2021
- Profitability margin comparison
- Top 10 companies by revenue

Key Insights

- Revenue increased by **35.11%** from 2020 to 2021.
- Operating income increased by **62.07%**.
- Net income increased by **102.63%**.
- Gross profit margin improved from **38.12% to 40.02%**.
- Operating margin improved from **13.95% to 16.74%**.
- Net profit margin improved from **8.50% to 12.75%**.

Skills Demonstrated

This project demonstrates practical experience with:

- Financial data analysis
- Spreadsheet-based data cleaning
- Excel/Google Sheets formulas
- Pivot tables
- KPI development
- Financial ratios and margins
- Year-over-year analysis
- Data visualization
- Business insights

Note

The dataset used for this project was obtained from Kaggle. The workbook contains the analysis and dashboard developed as part of this project.
